Ron Hentschel's article in Detroit News late Oct 2019

"Few" are trying to prevent Line 5 tunnel??

Moving to clean energy, even TC board is working toward 100% renewable.

Why would Enbridge pay \$500 million for the tunnel??

Enbridge is responsible for the 2 largest oil spills in the US. #1 was Marshall MI, closing 35 miles of Kalamazoo River for 3 years, costing > BILLION to clean up. What amount is Enbridge's insurance policy for?.....only \$1 MILLION

Line 5 has leaked > 30 times. Will get into the ground water, well water, rivers, streams and eventually the Great Lakes regardless of the tunnel.

MI lands and waters are already tainted and more leaks will happen. The people of MI do NOT want that Line and certainly not the tunnel, which is keeping the Line running risking > 80% of North America's fresh surface water, > 20% of the world's fresh surface water.

There are already alternatives for the Western UP's propane.

Water is our lifeline and more important than oil.

Did this commission agree with the article written??

Your vote for the resolution supporting a tunnel is a travesty and NOT a representation of the people of this region or the majority of all MI people.
