**NOTICE REGARDING BACKFLOW PREVENTION ASSEMBLY TESTING/TESTERS**

Beginning January 1, 2018, test results of backflow prevention assemblies are valid only if testing was performed by individuals holding an active ASSE 5110 certification.

A listing of all ASSE approved devices may be found at [www.asse-plumbing.org](http://www.asse-plumbing.org). Michigan also allows devices approved by the Canadian Standards Association (CSA). The appropriate CSA standards for each type of backflow preventer can be found in the latest edition of the Michigan Plumbing code.
